

EXFO's – AXS-200/850

Ethernet Test Set

Delivers comprehensive, yet straightforward test functionalities for installing, turning up or maintaining Ethernet and IP services.

Key Features

- Bit-error-rate testing (BERT) up to layer 4 with a wide range of standard and customizable patterns
- RFC 2544 industry-standard range of tests: throughput, back-to-back, frame loss and latency
- Ability to encapsulate up to two VLAN layers for all tests including the modification of VLAN ID, priority, type and drop eligibility
- Traffic generation: ability to increase or decrease the bandwidth and frame size in real time
- Intelligent autodiscovery: ability to find multiple remote AXS-200/850 units and loop them up or down for loopback testing
- Smart Loopback: ability to loopback incoming test traffic up to layer 4
- Q-in-Q: ability to encapsulate up to two VLAN layers and modify the parameters (ID, priority, type and drop eligibility)
- Optical power readings available during all testing phases
- Interoperates with EXFO's Packet Blazer Ethernet test module series—the FTB-8510, FTB-8510B, FTB-8510G, FTB-8120NGE and FTB-8130NGE

Other Modules

Three series of modules are available for optimal flexibility in residential and commercial network testing with the EXFO AXS-200:

Ethernet Series

AXS-200/850 Ethernet Test Set

Copper/DSL/Triple-Play Series

AXS-200/610 30 MHz Copper Test Set

AXS-200/620 ADSL2+ Triple-Play Test Set

AXS-200/625 30 MHz Copper and ADSL2+ Triple-Play Test Set

Optical Series

AXS-200/350 OLTS Test Set

AXS-200/360 Fiber Certification Test Set
