

EXFO's AXS-110 Handheld OTDR

*Compact, rugged, lightweight OTDR optimised
for access/FTTx and LAN/WAN network testing*

- A single unit for testing singlemode as well as 50 and 62.5µm multimode fiber
- 850, 1300, 1310 and 1550 nm wavelengths, with respective dynamic ranges of 24, 25, 32 and 30 dB
- Unrivaled event dead zone of 0.8 m, for easy location and characterization of all events
- Top user-friendliness: one-touch testing, summary screen
- Complete connectivity flexibility: USB stick compatibility and USB cable data download
- 8-hour power autonomy
- Lightweight: 1 kg
- Large internal memory (up to 500 results)
- Transflective color display for viewing clear results under bright sunlight
- Superior automated analysis for a better, easier and faster diagnosis

EASY LOCATION AND CHARACTERIZATION OF EVENTS

The AXS-110 OTDR models help you boost test productivity for inside-plant applications. Its exceptional 0.8 m event dead zone enables you to easily locate and characterize all events between the transmitter and the central office's fiber, access and FTTH network applications, where events are usually closely spaced.

MULTIMODE AND SINGLEMODE FLEXIBILITY

The AXS-110 All-Fiber OTDR combines singlemode and multimode functionalities, ideal for premises/private/enterprise network testing. Test multimode fiber within premises, or singlemode fiber between premises—all with a single OTDR unit—and maximize your return on investment.

END-TO-END PON CHARACTERIZATION

The AXS-110 OTDR models let you test through high-port-count splitters—even 1 x 32 splitters—perfect for passive optical network (PON) testing.

AXS-110-12CD-23B-EA-EUI-91-EI-EUI-91

- All Fiber QUAD OTDR SC/SCA 850/1300/1310/1550nm, 24/25/32/30dB
- - 2 rechargeable batteries & AC adapter/charger
- - Soft carrying case
- - Shoulder strap
